

NCC recommendation in response to the current Covid-19 situation

12th May 2020

The NCC recommends that commercial coasteering is currently suspended until we get appropriate guidance and clearance from the relevant home nation and local authority. We suggest that all providers/members must also check with your insurance provider/your local landowner/access provider and the relevant local/regional authorities that have input into your coasteering sites. We will add more advice and guidance as the situation develops.
